

# Test forms for the External Quality Assessment (EQA) for laboratories participating in the European Antimicrobial Resistance Surveillance Network (EARS-Net), 2022

When submitting the results online, the EARS-Net participants will be asked for the following information:

## TEST FORM METHODS

*Escherichia coli* - strain no. \_\_\_\_\_

For penicillins, it should be assumed that intravenous administration will take place; amoxicillin should be tested, regardless of results obtained for ampicillin.

For aminoglycosides and colistin, it should be assumed that the antimicrobials will be administered in combination with other agents.

Breakpoints currently based on ECOFF values can be used for interpretation of results, if no others exist, when applicable.

1. Which methodology did you mainly use for antimicrobial susceptibility testing (AST) in this EQA exercise?

- Broth microdilution
- Macro broth dilution (tubes)
- Agar dilution
- Gradient test
  - E-test
  - MIC strip
  - Other – specify: \_\_\_\_\_
- Disk/Tablet diffusion
  - Oxoid
  - Neo sensitabs
  - BD/BBL sensi disc
  - MAST
  - Liofilchem
  - Other– specify: \_\_\_\_\_
- Automated system
  - VITEK
  - Phoenix

Microscan Walkaway  
 Other – specify: \_\_\_\_\_

Other  
 If other, please specify: \_\_\_\_\_

2. Which standard/guideline did you use when performing AST?

EUCAST  
 Other  
 If other, please specify: \_\_\_\_\_

3. Would you normally send this (invasive!) strain to a reference or other laboratory?  
 Yes/No

4. Please change method for the relevant antibiotic(s) if it differs from the chosen method in question 1. The result will by default be set to the information provided in question 1.

| Antimicrobial               | Method |
|-----------------------------|--------|
| Amikacin                    |        |
| Amoxicillin                 |        |
| Amoxicillin-clavulanic acid |        |
| Ampicillin                  |        |
| Cefepime                    |        |
| Cefotaxime                  |        |
| Ceftazidime                 |        |
| Ceftriaxone                 |        |
| Ciprofloxacin               |        |
| Colistin                    |        |
| Ertapenem                   |        |
| Gentamicin                  |        |
| Imipenem                    |        |
| Levofloxacin                |        |
| Meropenem                   |        |
| Moxifloxacin                |        |
| Ofloxacin                   |        |
| Piperacillin-tazobactam     |        |
| Tigecycline                 |        |
| Tobramycin                  |        |

| Strain ID | Antimicrobial               | Results and interpretation |  |                   |
|-----------|-----------------------------|----------------------------|--|-------------------|
|           |                             | ≤<br>>                     | MIC value (mg/L)<br>or zone diameter<br>(mm) | S / I / R /<br>NA |
|           | Amikacin                    |                            |  |                   |
|           | Amoxicillin                 |                            |  |                   |
|           | Amoxicillin-clavulanic acid |                            |  |                   |
|           | Ampicillin                  |                            |  |                   |
|           | Cefepime                    |                            |  |                   |
|           | Cefotaxime                  |                            |  |                   |
|           | Ceftazidime                 |                            |  |                   |
|           | Ceftriaxone                 |                            |  |                   |
|           | Ciprofloxacin               |                            |  |                   |
|           | Colistin                    |                            |  |                   |
|           | Ertapenem                   |                            |  |                   |
|           | Gentamicin                  |                            |  |                   |
|           | Imipenem                    |                            |  |                   |
|           | Levofloxacin                |                            |  |                   |
|           | Meropenem                   |                            |  |                   |
|           | Moxifloxacin                |                            |  |                   |
|           | Ofloxacin                   |                            |  |                   |
|           | Piperacillin-tazobactam     |                            |  |                   |
|           | Tigecycline                 |                            |  |                   |
|           | Tobramycin                  |                            |  |                   |
